OMEGA Hanger Production Process

OMEGA Hanger Production Process: 1. Material Selection, 2. Design, 3. Manufacturing, 4. Finishing

YT Hanger Production Process

OMEGA Hanger Production Process: 1. Material Selection, 2. Design, 3. Manufacturing, 4. Finishing

→ 1. Material Selection: The first step in the production process is selecting the right material for the hanger. This involves choosing a wood that is strong, durable, and has a natural finish.

→ 2. Design: The next step is designing the hanger. This involves creating a blueprint that shows the dimensions and shape of the hanger. The design must be functional and aesthetically pleasing.
