

Hanger Description

Product Name	Product Name
Material	Material
MOQ	1000 Pieces
Lead Time	7-10 Days
Payment Terms	T/T, Western Union, Paypal
Shipping Terms	EXW, FOB, CIF, CNF, DDP, DDU
Shipping Method	DHL, FEDEX, UPS, TNT
Additional Information	<ol style="list-style-type: none"> 1. PE 2. K = K 3. K = K 4.
Price Range	150000-300,000
Payment Method	T / T, Western Union, paypal
Shipping Terms	EXW, FOB, CIF, CNF, DDP, DDU
Shipping Method	DHL, FEDEX, UPS, TNT
Additional Information	<ol style="list-style-type: none"> 1. 2. 3. 4. 5.

1. Electroplating

Electroplating is a process of depositing a thin layer of metal onto a substrate. The substrate is immersed in an electrolyte solution containing ions of the metal to be deposited. An electric current is passed through the solution, causing the metal ions to be reduced and deposited onto the substrate. The process is commonly used to improve the appearance and corrosion resistance of metal parts.

Electroplating is a process of depositing a thin layer of metal onto a substrate:

The process involves the following steps: 1. Preparation of the substrate, 2. Preparation of the electrolyte solution, 3. Electroplating, 4. Rinsing, 5. Drying. The electrolyte solution contains ions of the metal to be deposited. The substrate is immersed in the solution and connected to the negative terminal of a power source. The metal to be deposited is connected to the positive terminal. An electric current is passed through the solution, causing the metal ions to be reduced and deposited onto the substrate.
